DETAILED ACTION

Claims 29-66, 94-111 and 113-119 are pending. Claims 67-93, 112, 120 and 121 are cancelled. Claims 29-66 are withdrawn as being directed to non-elected inventions. Claims 94-111 and 113-119 are currently under examination.

Withdrawn rejections

Applicant's amendments and arguments filed 10/02/2008 are acknowledged and have been fully considered. Any rejection and/or objection not specifically addressed below are herein withdrawn.

Specification

The spacing of the lines of the specification is such as to make reading difficult. New application papers with lines 1½ or double spaced on good quality paper are required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 96-102, 107-109 and 116-118 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "solid drug component" is indefinite. The specification defines the highly plasticizing drug as being liquid [0036]. It is unclear why the term solid drug is used and the metes and bound of this term cannot be deciphered.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 101, 102, 104, 105, 110, 111, 113 and 119 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-3, 8, 9, 11 and 12 of prior U.S. Patent No. 7,070,808. This is a double patenting rejection.

Allowable Subject Matter

Claims 94, 95, 103, 106, 114 and 115 are allowed.

The following is an examiner's statement of reasons for allowance: US Patent's 7,070,808 and 7,150,881 were used to reject the claims under an Obviousness-type Double Patenting rejection. US Patent's 7,070,808 and 7,150,881 disclose an adhesive composition of the instant claims, however a crosslinking agent is also required. The

present invention differs in that the crosslinking agent is not required. Applicant has overcome the rejections by filing terminal disclaimers on 4/18/2008.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
